Problem Set 4

What to Do

1. Log into cs50.dev (https://cs50.dev/), which is a cloud-based version of Visual Studio Code (VS Code) that provides you with your very own "codespace" with everything that you need for the course pre-installed. No need to download and install VS Code or Python on your own Mac or PC!
2. Execute `update50` in your codespace's terminal window to ensure that your codespace is up-to-date; if prompted, click **Rebuild now**.
3. Submit all of the problems below:
    - Emojize
    - Frank, Ian and Glen's Letters
    - Adieu, Adieu
    - Guessing Game
    - Little Professor
    - Bitcoin Price Index

When to Do It
